The NEW ORIGINAL « CAMPAGNOLO » CALIBRATED QUICK RELEASE HUBS as studied by us rely upon:  
A PERFECT WORKING;

AN EASY INTERCHANGEABILITY of wheels without the help of tools;

A GREATEST FASTNESS AND STRONGNESS of the wheels;

AN ABSOLUTE GUARANTEE.

### INSTRUCTIONS FOR FITTING

- 1) - The ends of spindle 29 must not be longer than the thickness of the fork ends.
- 2) - The front fork ends 2 and the rear fork ends must be parallel both vertically and horizontally at the correct distance between, so that the wheel fits both fork ends without the least strain. This may be easily obtained by using the appropriate « Campagnolo » alignment tool gauge - see Fig. H on tools page of the catalogue.
- 3) - Adjust wingnuts 59 in a way that handles 61 do not make too much pressure to fix up the wheels,
